Our Story

We are a small family-run company based in Caldecote Village, Warwickshire. For generations, our family have worked in and around the ice-cream industry. Through our passion and love for food, we decided to use our experience and knowledge to create a selection of luxurious recipes made with real authentic ingredients. Sourced from around the world and designed in a factory constructed with the sole purpose of creating them. Over 8 years, we brought this dream to life, succeeding by failing in more ways than we thought possible! However, we believe we've now mastered our craft and started a company worthy of our name.
